ACT - TO SAVE THE ENVIRONMENT

At SHATABDI, Our vision is to make products which are environment friendly and keep the health of our Mother Earth in most habitable and suitable for all living beings presently as well as for the generations to come.

Completely stopping the use of single use plastic in any form and replacing it with non-toxic alternatives will be the major step in this direction.

To contribute in the direction of achieving this milestone at SHATABDI we have designed and are producing a range of tableware, food packaging and serving containers made from Bagasse (Sugar Cane Fibre), which is 100% safe for the environment at all stages from producing raw material, processing for production and after production consumption and disposal.

By using these eco friendly products each one of us can contribute his bit for the preservation and health of our eco system.

6" ROUND PLATE

TABLET TISSUE COMPRESSED COIN (PACK OF 20)

Features

"Just add water and watch the magic unfold".

A new environment-friendly product which can be used anytime anywhere.

Tablet towel is a concept to present your guests a cold or hot towel in a unique and innovative way. The compressed TABLET towel will expand into a full size napkin when a little water is added, which changes the common use of a napkin into an entertaining experience.

Made of 100% Pulp Rayon and Is Safe For all Skin Types. It has Revolutionized the Overall Process Of Using Wipes & Towels. Due To Its Compressed Form and Small Coin Size, the Tablet Napkin could easily Fit In a Purse, Glove Compartment Or Even A Backpack.

It is a product with universal applications. Being used in many different sectors, like Hospitality, Corporate, Airline, Medical, Catering and of course in General Household.
